

Overview of Academics at Girls Global

When the GGA team selected standards, the most important factor was that the standards align with our philosophy and approach to teaching and learning, and exemplify both our *mission and vision*. The standards must also connect with the four pillars of *sisterhood, scholarship, service, and safety*, and emphasize the *global* community. Most importantly, we want to make all educational materials *accessible* to all learners, take an *inquiry* stance in our approach, and be *culturally responsive* to the demographic of the students we serve.

For that reason, Girls Global Academy has adopted the following to prepare our students for both college and career:

- [Common Core State Standards](#)
- [International Baccalaureate](#)
- [Advanced Placement](#)
- Career and Technical Standards for
 - [Engineering Pathway](#)
 - [Business Pathway](#)
